

# Dr. Arjang Yazdani

B.Sc., M.D., FRCSC

Dr. Arjang Yazdani, BSc, MD, FRCSC, is a Royal College-certified Plastic Surgeon specializing in both reconstructive and cosmetic plastic surgery. His practice offers a complete range of cosmetic services, spanning surgical to non-surgical. The surgical practice includes all types of surgical cosmetic procedures, including facial, breast and body contouring plastic surgery. Complementing these services are non-surgical treatments, including injectables, laser treatments, facials and skincare, as well as non-surgical body treatments.

Many doctors advertise surgical cosmetic services, but only Plastic Surgeons offer the highest possible standard of expertise. Plastic Surgeons in Canada are accredited by the Royal College of Physicians and Surgeons only after completing a rigorous qualification process, including a five-year residency training program and a comprehensive set of written and oral examinations focused in the plastic surgery specialty.

After completing his residency training at Western University in 2006, Dr. Yazdani undertook his Fellowship training in Dallas, learning from some of the world's most renowned Plastic Surgeons. He then returned to Canada to start his reconstructive plastic surgery practice in London at LHSC's Victoria Hospital. Currently an Associate Professor at Western University, he has published scholarly papers in international medical journals on facial cosmetic surgery. He is also a member of the Canadian Society of Plastic Surgeons. Dr. Yazdani serves as the Chief of Plastic Surgery at the London Health Sciences Centre, and the Chairman of Plastic Surgery at Western University.

Dr. Yazdani brings the highest level of plastic surgery expertise to his patients' treatment and the students and surgeons he trains.
