

# Create Medication Order and Document Immediately

## 2016 Upgrade

<b>Appearance</b>	No change
<b>Functionality</b>	You will not have to enter the provider's name repeatedly. Provider's name automatically populates in Ordering Provider field after the first entry.
<b>Workflow</b>	Saves you time. You do not have to re-type <b>Ordering Provider</b> name.

There may be occasions when you need to enter the electronic medication order and document as administered at the same time.

When you access the **Medication Administration Wizard (MAW)** and click **Create order and document**, you only need to input the Ordering Provider once.

Medication Administration

Nurse Review Create order and document. Last Refresh at 12:57

Profile, Mock Female MRN: J1401556 DOB: 1959/08/08 Age: 57 years Loc: 6INPT OF; A  
FIN#: 432127818 \*\* Allergies Not Recorded \*\*

As long as you do not exit the MAW, all subsequent medication scans will default with the provider you entered the first time.
