

# Basic Life Support Patient Care Standards

## Summary of Changes

### Version 3.1

The following changes have been made between version 3.0.1 and 3.1:

#### Updates

- Correction of publication error in “Hazardous Materials Injury Standard”.
- Correction of publication error in “Burns (Thermal) Standard”.
- Minor revision to “Mental Health Standard” regarding inter-facility transports.
- Correction of publication error in “Mental Health Standard”.
- Revision to ETCO<sub>2</sub> range in “Respiratory Failure Standard” from “30-40 mmHg” to “35-40 mmHg” to better align with other standards and best practice guidelines for ventilation targets.
- Revisions to the “Acute Stroke Bypass Protocol” of the “Cerebrovascular Accident (CVA, “Stroke”) Standard” to increase the “last seen normal” window from 4.5 to 6 hours in regions where Endovascular Therapy (EVT) is available.
- Revisions to “Paramedic Prompt Card for Acute Stroke Protocol” to reflect changes to the standard. Update of the title to align with standard.
