

Welcome to London Health Sciences (LHSC) Obstetrical Outpatient Clinic

Questions??

Our team wants you to be prepared and well informed throughout your pregnancy. Please ask your physician or nurse if you have any questions or concerns.

Resources & Support

A Nurse, Social worker and a Dietician are available to you. If you feel the need for either of these services please notify your CA or physician and they will arrange for them to see you here or to call you at home.

Self- Referral OB Clinic

IF you don't have a family doctor to contact and you are a patient of the OB self-referral clinic, you may call to speak with a team member at 519-685-8500 ext. 55297 if you have any concerns.

What to expect during your visit

There are nine pods in our new area each with a different physician. A volunteer and/or signs will help you if you don't know what pod your doctor is working in.

For every appointment, please register at the Patient Registration Office. You will need to show your health card to the receptionist.

On your first visit, you will be asked to complete a medical questionnaire.

.Please fill this out while you are waiting. A Clinic Assistant (CA) can help if needed.

You will be asked to wait in the waiting room. One of our CA's will call you into the clinic Pod..

There are many physicians working in our clinic at one time. If your wait has been exceptionally long please check with the CA or registration for an update.

What happens in the clinic?

The CA will bring you to our interview room. You will take your weight and put your urine sample on the counter. Please put your name on the cup.

One of our CA's will record your weight, blood pressure and urine test results.

You will then go to an examination room to see the doctor or be asked to wait in the waiting area.

You may ask to speak to a Nurse or Social Worker at any time if you have questions or concerns.

Our doctors are Obstetricians and Gynecologists. They are very busy so your wait may be long. Bring a drink and snack if you wish. Please try not to book other appointments on the same day.

LHSC is a teaching hospital so please be prepared to see nursing and medical students or residents as well as your physician.

How many appointments will I need?

We will see you every 4 weeks until you are 28 weeks, then every 2 weeks and after 36 weeks we will see you weekly until you deliver your baby.

Please make a follow-up appointment 6 weeks after you have your baby with either your Obstetrician or family doctor.

Our Doctors deliver their own patient's babies if possible. However, they have a call schedule. You may be cared for by one of our other Obstetricians. She/he will have access to all of your patient information to provide you and your baby with the best quality patient care.

**Hand hygiene, it's everyone's responsibility
Please wash your hands upon entering and leaving the clinic.**

Welcome to the Obstetrical Clinic

OB PreAdmit Appointment, it's important for you and your baby....

LHSC provides a family centred care centre; however, as space is limited we ask that you limit the number of people you bring with you to your appointment.

The Birthing Centre is located in Zone B 4th Floor. To reach a receptionist at the Birthing centre call #519-685-8500 ext. 58438. You can park in the Parking Garage

For more information please visit www.lhsc.on.ca

At your first visit, the CA will give you information on our OB Preadmit program. When you are around 20 weeks book your appointment at Patient Registration. At your appointment, the nurse will explain what the Birthing Center has to offer, complete your medical history, review your birthing plan and give you valuable hospital and community resources. Although we want all our patients to attend OB Preadmit it is a mandatory appointment only for anyone having a Cesarean Section.

A DVD is available for you to view on line at www.lhsc.on.ca/havingababy. The video provides information on how to locate the Birthing Center, what it looks like and what happens when you arrive. For those signed up for Prenatal Classes, you will be given this DVD.

If you are a resident of Middlesex County a referral to Public Health will be made. A nurse may contact you before and/or after your baby is born. More information on MBW is available at www.lhsc.on.ca under Program and Services.
